Frontier

OVERVIEW

Frontier Communications is a Fortune 500 company with wide brand recognition across the U.S. We provide a robust portfolio of data networking, voice, Internet, Cloud and CPE services. With our footprint covering 29 states, Frontier's advanced fiber network can deliver the networking connectivity and managed business solutions your customers are looking for. And our products scale to meet any business need: from small businesses that need a solution for ten employees, to large Enterprises with thousands of employees.

KEY FEATURE AND DIFFERENTIATORS

Our solutions include both hardware (e.g., cabling, switches, firewalls, access points) and support (e.g., design, installation, deployment, and 24/7 monitoring) Frontier has enterprise-grade solutions; the cheaper options will not provide you with the same support, security, and performance. Building the perfect network takes time, but it is worth it when you do not have to make expensive upgrades in the future. Our Solution Engineers and design team will work side by side with you to ensure the solution meets your specifications the first time. Frontier has an industry leading fiber footprint in numerous target markets Small companies that compete as a "low-cost" competitor; often offering limited support or lower grade technology - Frontier can provide the connectivity.
