## IDEAL CUSTOMER PROFILE

- Verizon is one of the largest communication technology companies in the world.
- We're using our award-winning networks to make breakthroughs in interactive entertainment, digital media, IoT and broadband services for customers.
- Verizon's hard-working business technology solutions bring you strong infrastructure and broad product portfolios with global reach. We serve enterprises of any size, including 98% of the Fortune 500, and many federal agencies.

## INDUSTRY RANKINGS

We're recognized by industry analyst firm Gartner as a Leader in the current Gartner Magic Quadrant reports for 2019 Network Services, Global and the 2019 Managed Security Services, Worldwide. We're also the only telecommunications company in the world to be named a Leader in both the Magic Quadrant for Network Services, Global, and the Magic Quadrant for MSS, Worldwide – a position we've maintained for three straight years.

Additionally, we received some of the top scores in Gartner's 2019 Critical Capabilities for Network Services, Global report. Read on and see for yourself.

over our global IP network, UCCaaS is designed to emulate the high degree of availability, reliability, resiliency, and security found in the most sophisticated carrier-class networks. Fully redundant data center pairs across 3 continents - 100% application availability SLA with global geographic redundancy

### SDWAN

What is Software Defined Secure Branch? Our Managed Software Defined Secure Branch services provide you the flexibility to configure your WAN to optimize your branch's networking and security needs. It uses a customized and managed software defined services architecture on a single device, so you can quickly automate and deploy an application-driven, secure and hybrid WAN that's customized for each location.
